Airtouch Completes a Targeted Fundraising from Strategic Investors

Airtouch Solar Ltd., amongst the world's leading companies providing water-free robotic cleaning solutions for solar PV panels, announces today the completion of a targeted funds-raising of over USD 7 million from existing and strategic investors.

In order to serve the fast-growing demand for its products, coming from new and existing customers, Airtouch intends to double its manufacturing floor area and increase its capacity to achieve its fast-growing business goals.

Yanir Allouche, Founder and Chairman of the Board stated: "The focused and swift fundraising round enjoyed great over demand from existing and strategic investors, which signifies the great potential investors see in our Company. It symbolizes the vote of confidence we received from customers in both the domestic and Indian markets. The funds raised will allow us to continue to achieve our business goals during 2021 and onward".

Nick Lanir Brown, CEO: "We thank our expanding customers list for choosing Airtouch's robotic cleaning system as their preferred solution. Our recent fundraising round will enable us to maintain technology superiority, increase the added value we provide to our customers and penetrate new territories"

About Airtouch Solar: Airtouch developed an advanced proprietary & patented technology and is recognized as one of the world leading companies providing water-free PV solar panel cleaning solutions. The Company's headquarters and production plant are located in Israel. We are currently active and well recognized in the Indian and Israeli markets.
